

TECHNICAL SPECS: UV GREEN CLEAN BIO-WALL MAX 24"
HVAC DUCT MOUNTED UV-C AIR DISINFECTION SYSTEM
FOR CANNABIS GROW FACILITIES

Description

The UV GREEN CLEAN BIO-WALL MAX 24" is a high intensity UVC air disinfection system designed to be mounted in the return or supply ducting of the HVAC System. The Bio-Wall Max will destroy the harmful biological contaminants found within a Cannabis grow facility such as Powdery Mildew, Botrytis, Gray Mold, Downey Mildew, bacteria, and other associated airborne contaminants that can be harmful to plant life. The Bio-Wall Max is designed to be used in tandem with your HVAC system to prevent the outbreak of Powdery Mildew, and to insure growing the most consistent product through the removal of airborne pathogens.

UNIT/STANDARD EQUIPMENT part number: **GCBM24-G**

- Aluminum reflector assembly/steel ballast box casing. Combined shipping weight 42.5 lbs
- Lamp reflector assembly dimension: 5.25 in diameter x 30 in length
- Ballast box dimension: 19.4 in height x 3.2 in depth x 15.4 in length
- Voltage: 120/240 VAC, 60 Hz, single phase
- Power: 290 Watts
- Remote 7" Display screen for lamp monitoring
- Dry contact(s) in ballast box for BMS – ON/OFF remotely + contact for door cut off switch
- 5 – 24" straight UVC lamps (part no. LMPHGS240)
- UVC 254nm lamp wavelength
- 5 – 120V/240V dual voltage ballasts (part BST120/277SHS)
- 5 – High intensity aluminum reflectors
- **Warranty:** ballast-15 years, lamps-2 years
